Specification Sheet

Base Cabinet with Full Height Door

Available Models:

B-9	1 Door	R/L
B-12	1 Door	R/L
B-15	1 Door	R/L
B-18	1 Door	R/L
B-21	2 Door	
B-24	2 Door	
B-27	2 Door	
B-30	2 Door	
B-33	2 Door	
B-36	2 Door	

Any width available from 9 Inch to 36 Inch, and in any fraction of an inch.

Base Cabinets with Full Height Door are designed standard with two adjustable shelves and have either one or two doors depending upon width. Additional shelves and even pullout trays (up to 30" wide) can be added for specialty storage and added functionality to meet your needs.

Standard Height: 34.75" overall (31" box)
Standard Depth: 24" overall (23" box)

Available Modifications:

Extend Side Panel (L/R)	+12"
Increase Height	+6"
Decrease Height	-6"
Decrease Width	-3"
Increase Depth	+12"
Decrease Depth	-12"
Add Shelf (up to 36"W)	+1
Add Pull-Out Tray (up to 30"W)	+3

Visit werever.com to view available colors and door styles for all cabinets.

All Werever Outdoor Cabinets are constructed from solid, 3/4" high-density polyethylene

Specification Sheet

Base Cabinet with Top Drawer

Available Models:

B-9-D	1 Door	R/L
B-12-D	1 Door	R/L
B-15-D	1 Door	R/L
B-18-D	1 Door	R/L
B-21-D	2 Door	
B-24-D	2 Door	
B-27-D	2 Door	
B-30-D	2 Door	

Any width available from 9 Inch to 30 Inch, and in any fraction of an inch.

A Base Cabinet with Top Drawer is the most common style cabinet in any kitchen. The top drawer provides great storage for grilling tools, utensils, foil, mitts and other accessories, while an adjustable behind the doors provides storage space for larger items. Add pullout trays for ease of access to items stored below or remove the adjustable shelf to storage larger or taller items.

"Warming Drawer"

Grill Cabinets are cut and built to order, with face plate, doors, and support structures designed and cut specifically for your Grill model and your countertop thickness. Every Grill installed in a Werever Cabinet requires an Insulating Jacket for combustible enclosures from the Grill Manufacturer.

Some Grills allow for a Warming Drawer to be installed in the cabinet below. Alternatively, a Warming Drawer can be installed in the top face panel of a separate Grill Cabinet. Consult with your Account Manager for more information on Grill Cabinets and important Appliance specifications.

Any width available from 27 Inch to 63 Inch (64" wide available as needed). Overall size of the Grill Cabinet is determined based on the cut-out and clearance specifications from the Grill and Insulating Jacket Manufacturer. Consult with your Account Manager for the correct size Grill Cabinet.

NOTE: Special modifications can be made to the height and depth of many Grill Pedestal Cabinet models to create Bench Seating that coordinates with your Outdoor Kitchen. Add custom seat cushions made by your local upholsterer for comfortable and functional seating.

Visit werever.com to view available colors and door styles for all cabinets.

All Werever Outdoor Cabinets are constructed from solid, 3/4" high-density polyethylene

Specification Sheet

Built-In Appliance Pedestal Cabinet

Available Models:

BAP-24	2 Doors
BAP-27	2 Doors
BAP-30	2 Doors
BAP-33	2 Doors
BAP-36	2 Doors

The Built-In Appliance Pedestal Cabinet provides functional storage and added support to carry the weight of a variety of appliances. The most common use of this cabinet is with Kamado-style grills. The front stretcher and raised sides allow for countertop to surround the unit for a true built-in application. The open space in this cabinet may also be used to house a microwave or other small appliance.

Every Grill installed in, on, or near a Werever Cabinet requires maintaining appropriate clearances to combustible materials. Consult with your Account Manager for the correct use and size of the Built-In Appliance Pedestal Cabinet.

Specification Sheet

Blind Base Corner Cabinet

Available Models:

BBC-36 1 Door R/L
BBC-42 1 Door R/L

Blind Base Corner Cabinets provide extra storage in what may otherwise be dead space in the corner of your project. This cabinet includes a set-back adjustable shelf so you may store both taller and shorter items. If your project layout has a corner, ask your Account Manager to maximize storage with a Blind Base Corner Cabinet.

Any width available from 36 Inch to 42 Inch, and in any fraction of an inch.

Specification Sheet

Bi-Level Cabinets (Bar Cabinets)

Available Models:

Add "BL-" to the front of any standard Werever Cabinet model to make it Bi-Level, including:

Full Height Door Cabinets
Base Cabinets with Top Drawer
Sink Base Cabinets
4-Drawer Base Cabinets
Pullout Trash Cabinets
Grill Cabinets
Side Burner Cabinets
Blind Base Cabinets
LP Tank Cabinets
Open Base Cabinets
Refrigerator End Panels

Bi-Level Cabinets allow you to create a bar section without building a retaining/pony wall. This cabinet has a 4.5" deep section integrated at back and rises 6" above the working surface (standard bar height). Bi-Level Cabinets are built as a single structural unit with no seams in the cabinet sides for strength and structural integrity at the sides and bar section.

The Bi-Level Cabinet design is available for all standard Werever Cabinets. Complete the look with Finished Back Panels in either plain or with decorative detail upgrade.

Corbels

Available Models:

CORB-A	Arched Corbel
CORB-D	Deluxe Corbel
CORB-S	Standard Corbel

Corbels add both aesthetics and function. Corbels may be used on the back side of an island or free-standing layout of cabinetry to help support your countertop or bar top overhang for seating. They can even be used on the end of a run for added countertop surface beyond the cabinets if space allows. Corbels are constructed from the same color of HDPE as your cabinetry order.

Standard Size:

9" Deep, overall
10" High, overall
2.5" Wide, overall

Available Modifications:

None available.

NOTE: Please consult with your Countertop Fabricator and installer for the optimal method of installation of corbels to properly support your countertop or bar top overhang. Additional reinforcement may be required in the field and will not be determined or provided by Werever.

Specification Sheet

Fillers

Available Models:

Base Filler (BF-)

The Base Filler is used between a cabinet and a wall, or two cabinets when the faces are not aligned. This filler will ensure your cabinet door will clear and open beyond 90 degrees. Stainless steel binding posts are utilized to connect the filler to the cabinet. Base Fillers can be trimmed and scribed once cabinets are level, square and plumb.

Available 1" wide up to 12" wide (L/R).

Double Return Filler (BFDR-)

The Base Filler with Double Return is used between two cabinets where the faces are aligned; two returns allow you to connect the filler to a cabinet on each side. Double Return Fillers may not be trimmed during installation and should be ordered to fit. Use this filler if you are spanning an area with a post or other obstruction.

Available 1" wide up to 12" wide (L/R).

Wall Filler (WF-)

Wall Fillers have the same return piece as all base fillers to connect to the side of the cabinet box, and also have a bottom piece to conceal the void between the wall and the Wall Cabinet. Use a Wall Filler between the cabinet and wall to allow your cabinet door to open the full 100 degree swing of the hinges.

Available 1" wide up to 6" wide (L/R).

Base Corner Filler (BCF-)

Rather than having to trim and miter fillers at a dead corner, Werever offers a Base Corner filler precisely sized to fill the corner of your project. A minimum of 2"-3" is recommended at a dead corner with standard cabinets. A minimum 5-6" is recommended if a Grill or Side Burner are positioned next to the corner.

Available 3"x3", up to 12"x12"

Refrigerator Filler (RF-)

Refrigerator Fillers are used between a Cabinet and an Appliance. They are used particularly if clearance is required for a door or drawer to open. This filler may not always be required, and your Account Manager and Designer will assist you with the correct application and use.

Available 1" wide up to 12" wide (L/R).

Wall Corner Filler (WCF-)

Wall Corner Fillers provide extreme ease for installation. Two wall fillers join to form one and are cut specifically to your project so there is no need to fit and trim in the field. A precisely fabricated bottom panel conceals the void between the wall and the Wall Cabinet. The 3"x3" size allows for doors to open clear of the adjoining run.

Available 3"x3".

All fillers are sized to the height of your base, wall, or pantry cabinets. Fillers can be used in a variety of ways to give you the perfect, custom fit. Consult with your Account Manager on the best use and style of filler.

Visit werever.com to view available colors and door styles for all cabinets.

Specification Sheet

Corner Posts

Available Models:

Standard Corner Posts:

CP-90 4" x 4"
CP-45 6" x 6"

There are times when additional structural support is needed, for example when attaching finished back panels to cabinet installations or in voided areas. Werever builds Corner Posts that use the same leveling legs as their cabinets to simplify installation and allow toe kick pieces to be attached. Your design may call for these pieces which greatly reduce installation difficulty and improve the structural integrity of the finished project.

Example Rendering of Corner Posts

Rendering also features Werever's Decorative Back Panels (DBP-) used in an island or other free-standing designs.

Available Modifications:

Height can be modified to coordinate with your Cabinet height.

NOTE: Your Account Manager and Designer will assist you with the recommended placement of Corner Posts in your design plan. Please also consult with your Installer and Countertop Fabricator regarding the required support needed for your project installation.

Toe Kick

Available Models:

TK-6 5" Tall

Toe Kick may be modified up to 10" Tall, as required.

Fixed 72" width.

All Werever Cabinets install on adjustable legs, allowing for a level, square and plumb installation regardless of uneven floor surface or slope in your outdoor environment. Toe Kick material, of the same 3/4" thick solid HDPE material as the cabinetry, clips on these adjustable legs with clips provided with your order. Toe Kick is trimmed and ripped during installation for a perfect, finished fit at the floor line.

Toe Kick clipped to the adjustable legs.

Toe Kick installed around adjustable legs.

All Werever Outdoor Cabinets are constructed from solid, 3/4" high-density polyethylene

Specification Sheet

Access Doors

Available Models:

AAD
AAD DOUBLE

There are times when you may want to utilize a dead corner for storage, or you may have things like plumbing that you need to reach after your cabinet project is installed. This is the purpose of the Access Door. These doors come in a single, or double door configuration depending on the width of the opening. The Access Door is hinged, and will blend in seamlessly with the style of your back panel.

AAD Front

AAD Back

Available Modifications:

Height and Width can be modified, available up to 18" single door, and 36" double door.

NOTE: Your Account Manager and Designer will assist you with the recommended placement and size of Access Doors in your design plan.

Example Rendering of back panel with Access Door.

Rendering also features Werever's Decorative Back Panel (DBP-) used in an island or other free-standing designs.
